NVIDIA AI Enterprise

Introduction of NVAIE

NVIDIA AI Enterprise Software Suite

Enterprise AI for Everyone, Everywhere, on Every Platform

<https://www.nvidia.com/ai-enterprise-suite/>

NVIDIA AI Enterprise

Unleashing AI for Every Enterprise

Optimized for AI

Includes best-in-class frameworks and tools that streamline AI development and deployment, freeing organizations to focus on creating business value from AI.

Certified for the Enterprise

Reduce deployment risks with certification to deploy on popular enterprise platforms - bare metal, virtualized, public cloud, accelerated by GPUs or CPU-only

NVIDIA Enterprise Support

Ensure mission-critical AI projects stay on track with access to NVIDIA experts, long-term support, latest product updates & Enterprise Training.

NVIDIA AI Enterprise Service

Specific offerings for NVIDIA AI Enterprise

INCLUDED

- ❑ Business Standard Support Services
 - ❑ Standard SLA
 - ❑ Access to NV AI Experts
 - ❑ LTS-Long Term Branch Support
 - ❑ Priority Notifications

SUPPLEMENTAL

- ❑ Business Critical Support Services
- ❑ Technical Account Manager (TAM) Support

All support service products are renewable

- ❑ Design & Ideation Workshop
 - ❑ *Scoping use cases and requirements to enable AI vision.*
- ❑ AI Workload Onboarding
 - ❑ *Guidance and support to onboard a selected AI workload into the platform*
- ❑ Platform Health Check
 - ❑ *Assess areas of optimization and system functionality.*

- ❑ NVIDIA AI Enterprise Administration Public Bootcamp for IT Professionals
- ❑ Introduction to AI in the Data Center
- ❑ AI Accelerated Computing and Accelerated Data Science (Online & ILT)

NVIDIA AI Enterprise Support Service

Support Entitlements with NVIDIA AI Enterprise <https://docs.nvidia.com/ai-enterprise/latest/release-notes/index.html>

**Extend Your Team with Access to
NVIDIA AI Experts**

8-5 local business hours
Guidance on configuration + performance
Ticket prioritization.

**Stay Up to Date with Priority
Notification**

Latest security fixes, maintenance
releases, coordinated support across
partners.

**Control Upgrade and
Maintenance Schedule with Long
Term Support**

Up to 3 years for designated SW
branches.

**Flexible Deployment with One
License for All Platforms**

Virtualized, bare metal, public cloud,
CPU-Only.

**Upskill Your Workforce through
Enterprise Training Services**

Instructor-led workshops and self-paced
trainings.

Critical Support

Designated Technical Account Manager
and business critical 24/7 live agent
access.

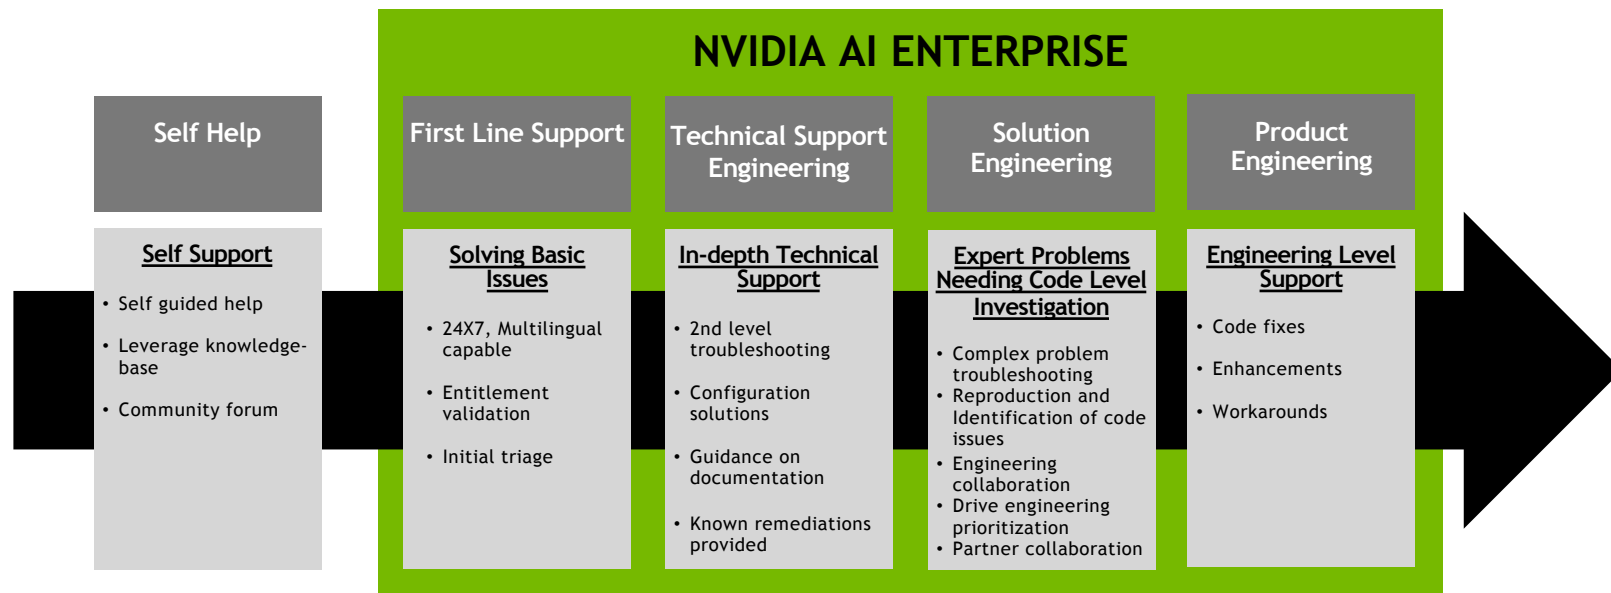

PROMOTION

SUPPLEMENTAL

NVIDIA AI Enterprise Support Service Detail

A Global Team Focused on Customer Success

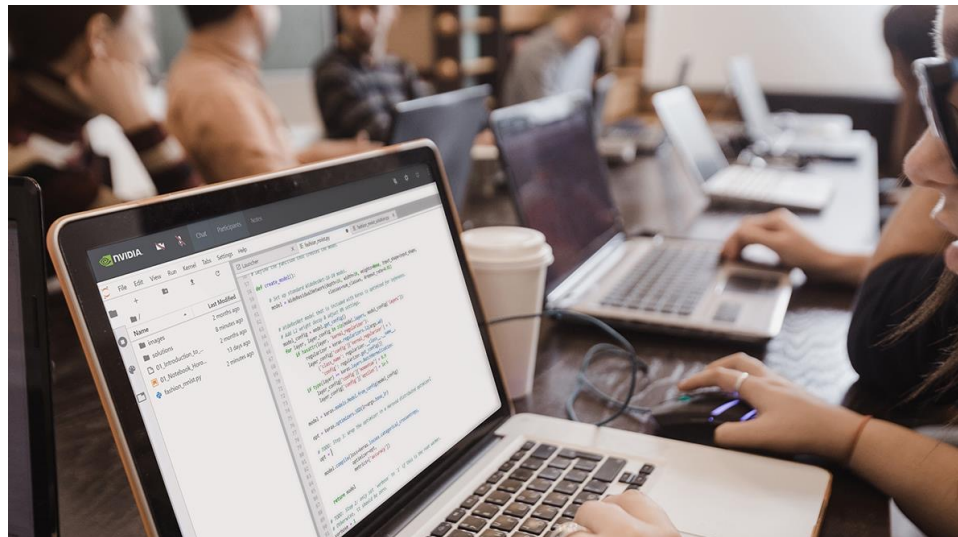

- NVIDIA Enterprise Experience experts cover all monetized NVIDIA Enterprise Products and process thousands of cases a month.
 - Including DGX, vGPU, NVIDIA AI Enterprise, Omniverse Enterprise, Fleet Command....etc.
- First line support (Portal/Call/Email) is 24x7.
- The global team is located across all regions.
- NVIDIA Enterprise Support has skilled solution engineers with deep expertise across NVIDIA Enterprise portfolio.

Upskill Your Workforce

Enterprise Training Services included with NVIDIA AI Enterprise subscription

- ▶ **NVIDIA Training Advisor** provides guidance on training and enrollment
- ▶ Courses for the AI Practitioner and the IT Admin
- ▶ For every 10 licenses, subscribers get access to:
 - One seat in an instructor-led workshop on [the schedule](#)
 - Two self-paced courses from [the catalog](#)
- ▶ Valid from 21-Mar to 20-Sep 2022
- ▶ Explore offer details and how to claim [here](#)

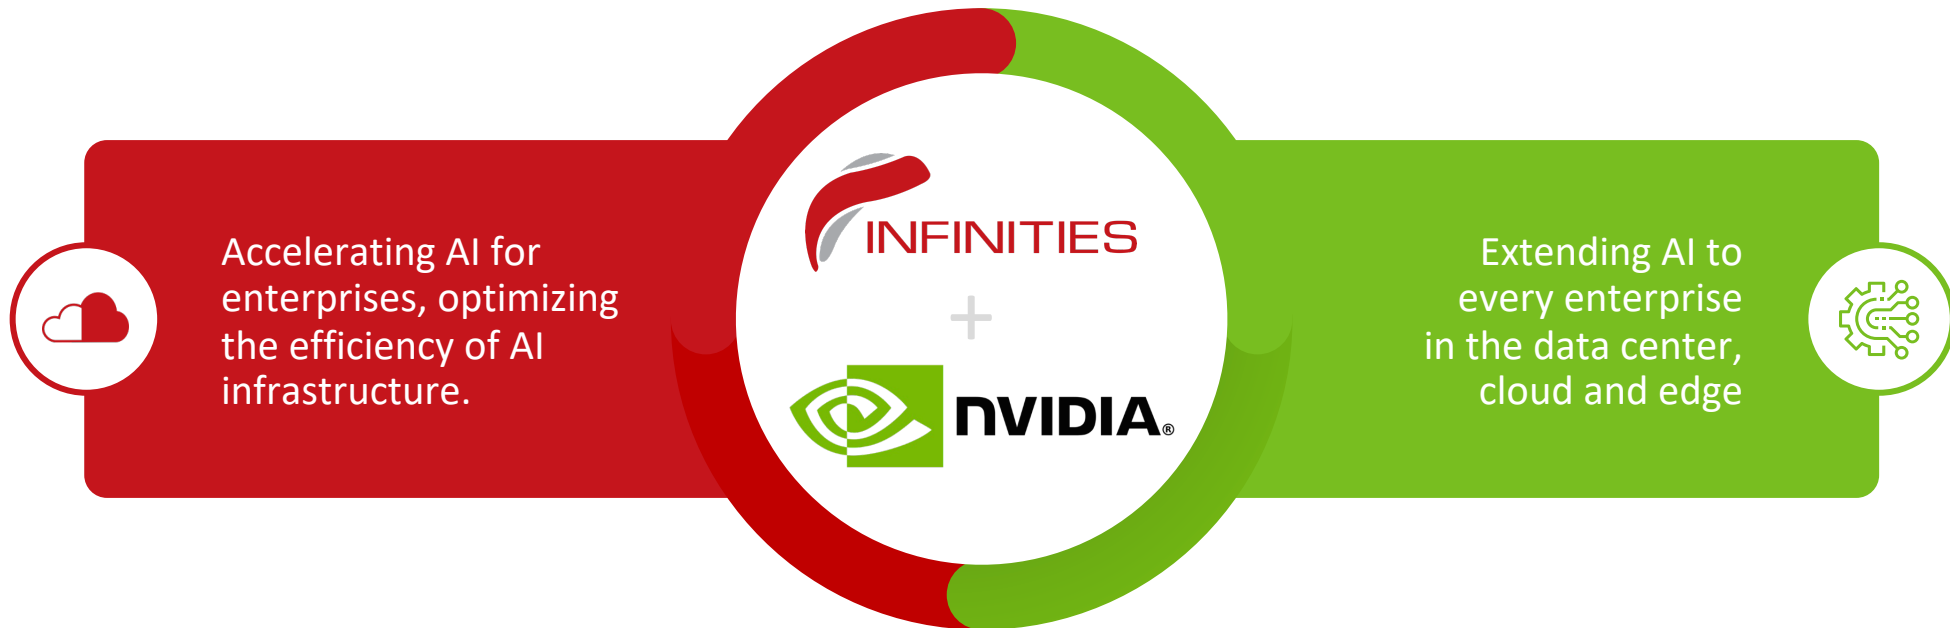

The Cooperation of **AI-Stack** and **NVAIE**

The Overview of AI-Stack and NVAIE

A strong alliance in enterprise-grade AI foundation

The Cooperation of AI-Stack and NVAIE

Domino Data Labs

The best AI-Ready Enterprise Platform for enterprises.

AI-Stack's integration for NVIDIA AI Enterprise pairs the Enterprise MLOps benefits of workload orchestration, self-serve infrastructure, GPU optimization and collaboration with cost-effective scale from containerization on mainstream accelerated servers.

For Data Scientists & AI Researchers

Focus on research instead of dev ops.

Launch AI-Stack on-demand, with NVAIE docker images configured with the latest data science tools, frameworks, and NVIDIA GPUs.

Data Scientist/
Developer/
AI Researcher

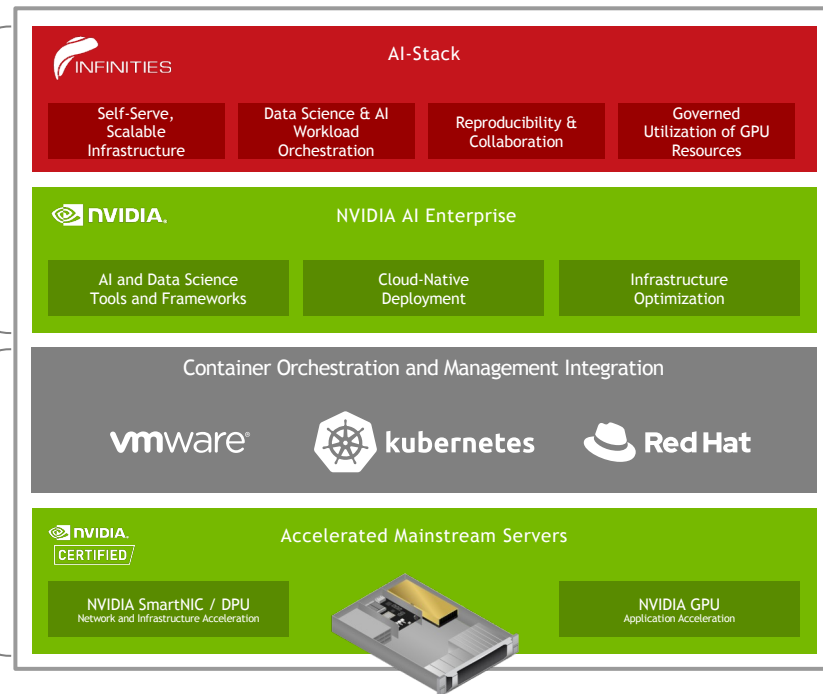

For IT

Get the confidence of enterprise-grade security, manageability, and support.

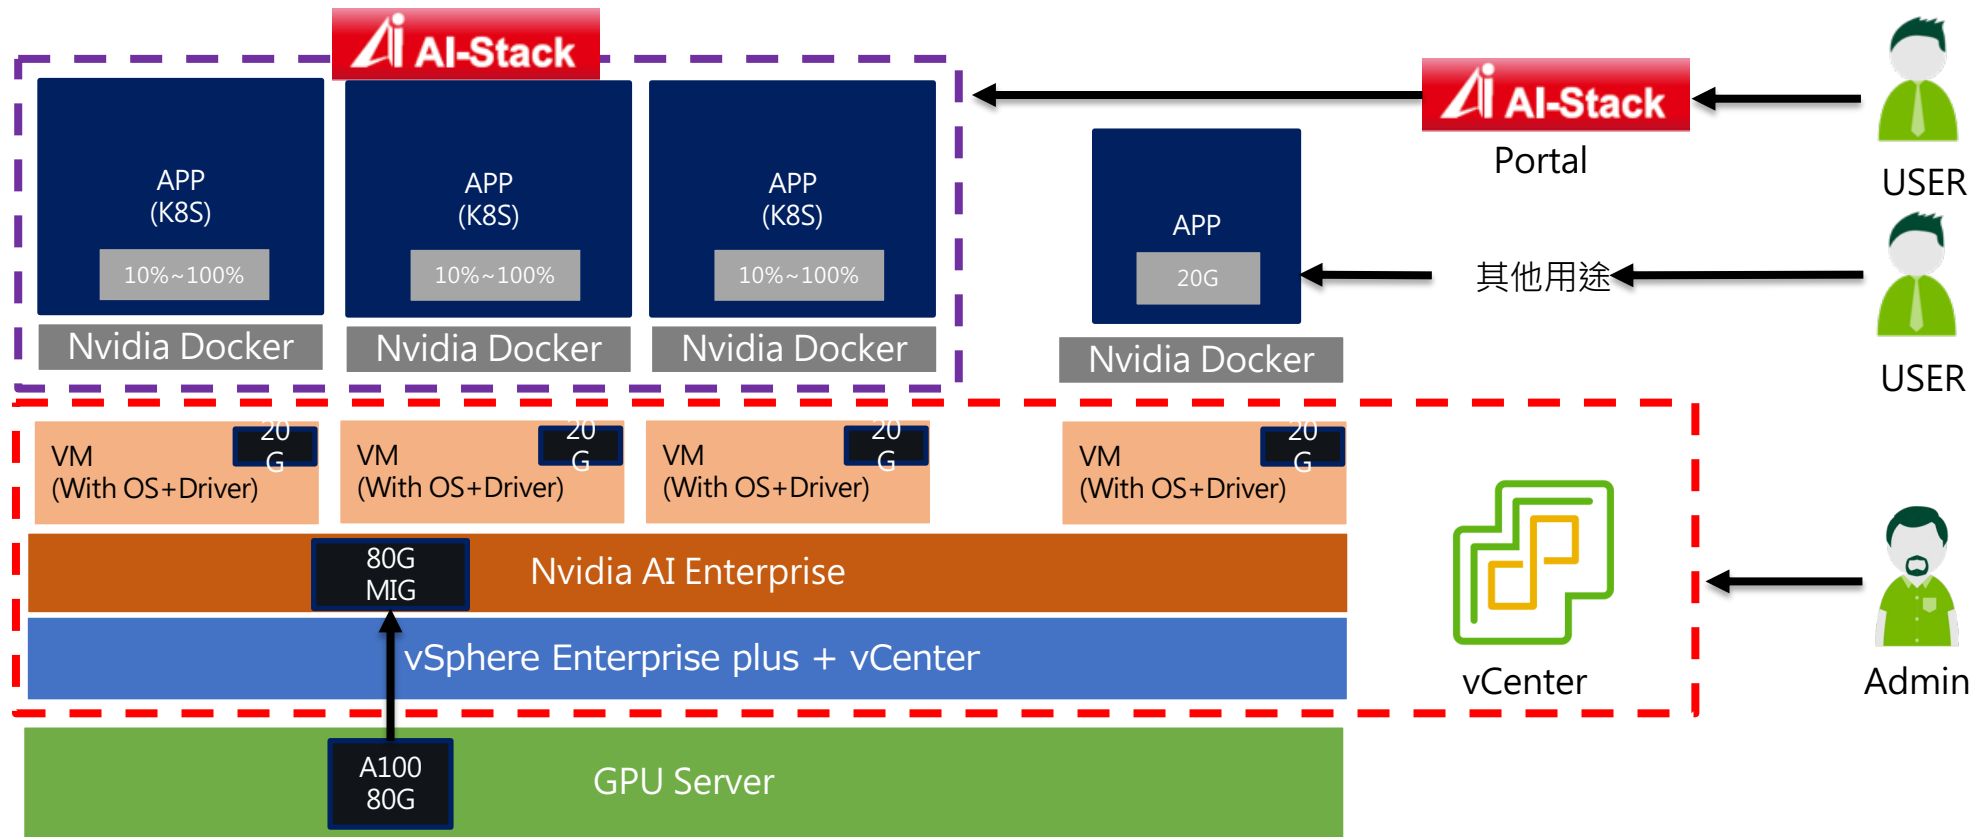

AI-Stack is validated to run on Kubernetes – all deployed on industry-leading, NVIDIA-Certified™ systems.

Case Study

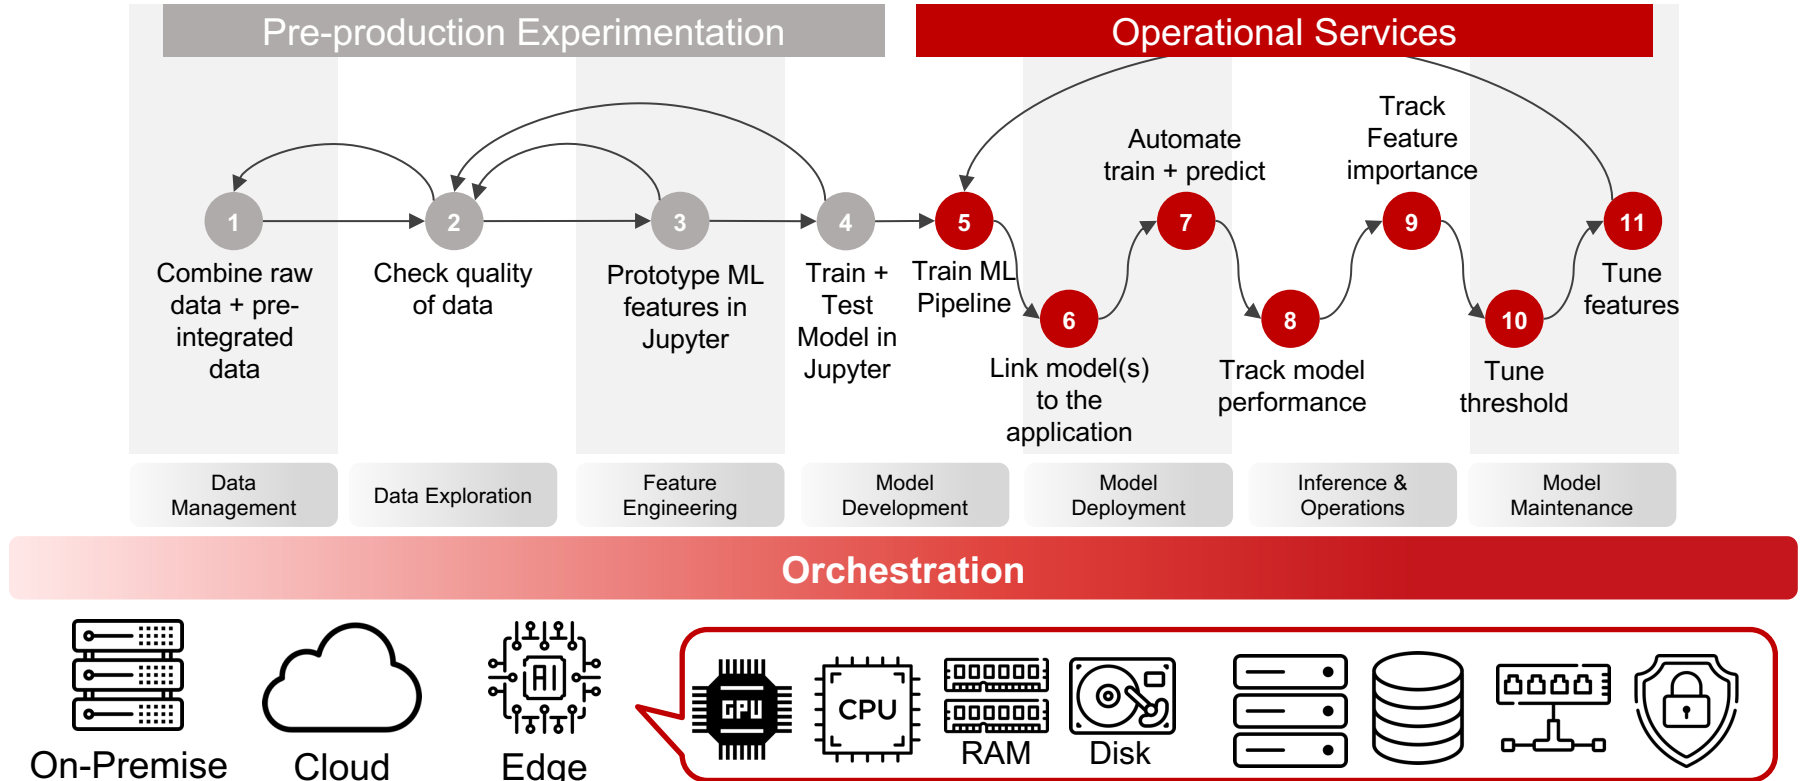

InfinitesSoft AI-Stack

Introduction of AI-Stack

AI Infrastructure is huge and growing, but **still immature**.

The pain point of AI-empowered enterprise digital transformation.

Research firm IDC predicts global AI spending in 2022 will reach \$433bn, nearly a 20% annual increase. However, AI infrastructure is complex to manage and scale. Companies see low hardware utilization, scheduling clashes and a delayed pace of innovation — if they can build functioning AI infrastructure at all.

1. Resource Management

Expensive computing resources but **low utilization** of GPUs

Complex to track and reproduce the AI Experiments

2. Development Management

Difficult to build AI models from 0 to 1 with high accuracy rate

Slow and lengthy process of AI model training

3. Deployment Management

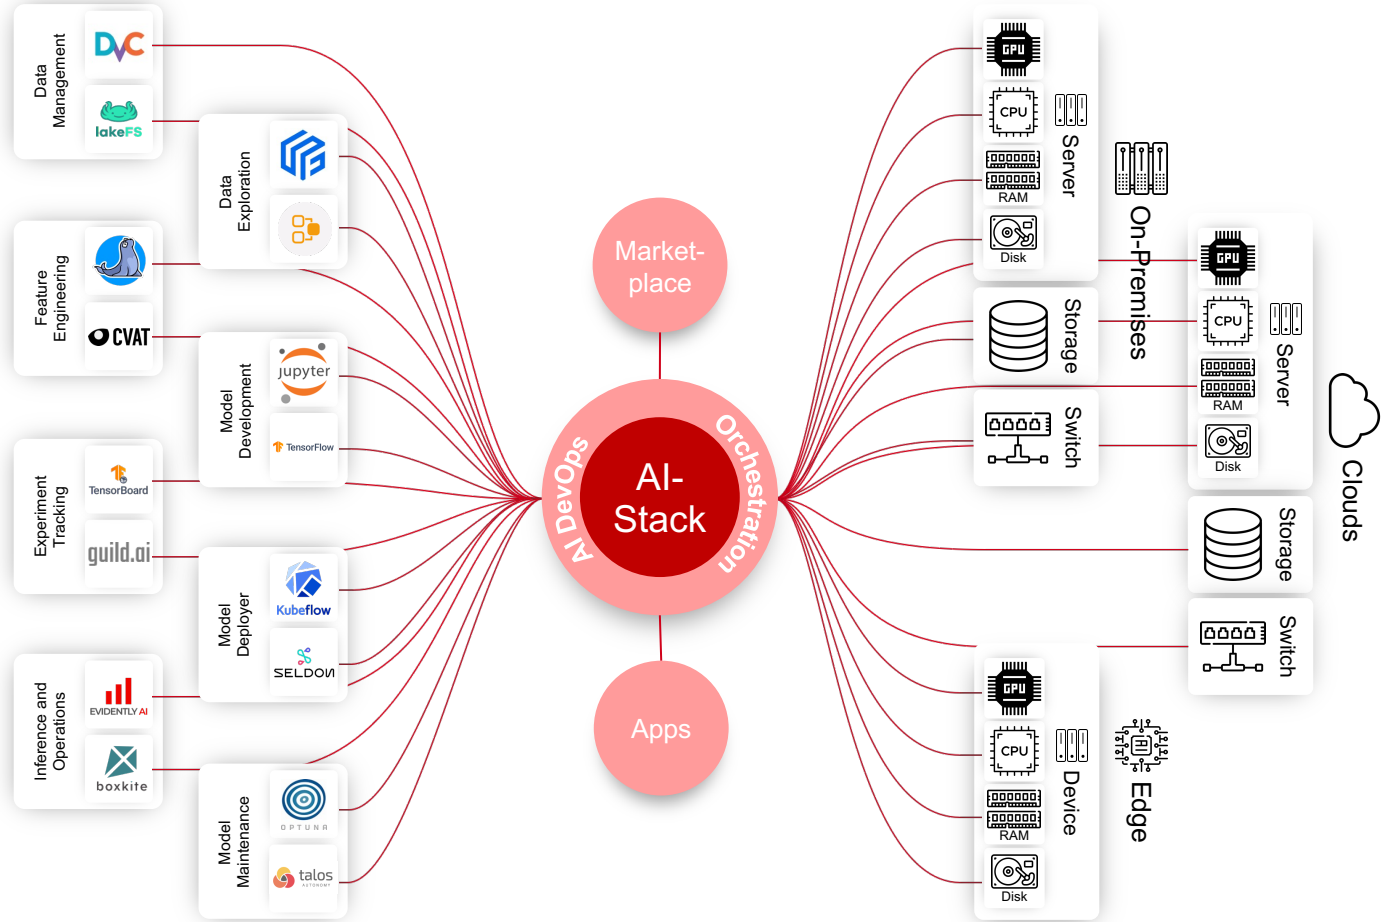

Complicated in deploying AI to cloud, on-prem and edge

Hassle to manage AI application operations

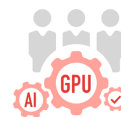

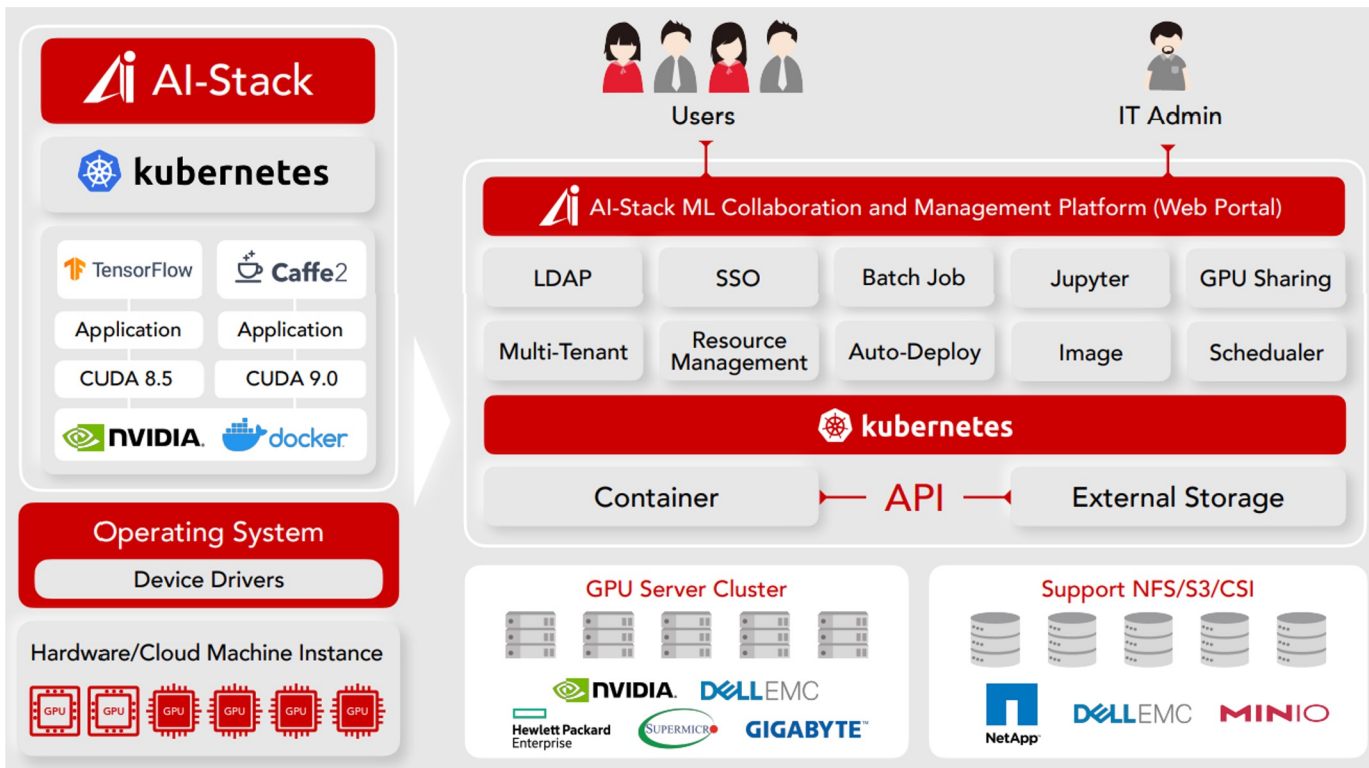

AI-Stack covers all AI DevOps needs in a scalable way.

AI-Stack provides a foundation for AI, whether on-premises, clouds, or edge, allowing organizations to have their AI resources on a single, unified platform that supports AI at all stages of development, from building and training models to running inference in production.

Empower your AI Teams.

We've built a software layer that abstracts AI hardware away from data scientists and ML engineers, letting Ops and IT simplifies the delivery of computing resources for any AI workload and any AI project.

Help the team manage GPU resources more efficiently

Seamlessly connect with commonly used AI development tools

Quota Limit

2500m CPU

Unlimited RAM

4096MiB GPU

Resource isolation, authority management and quota limit

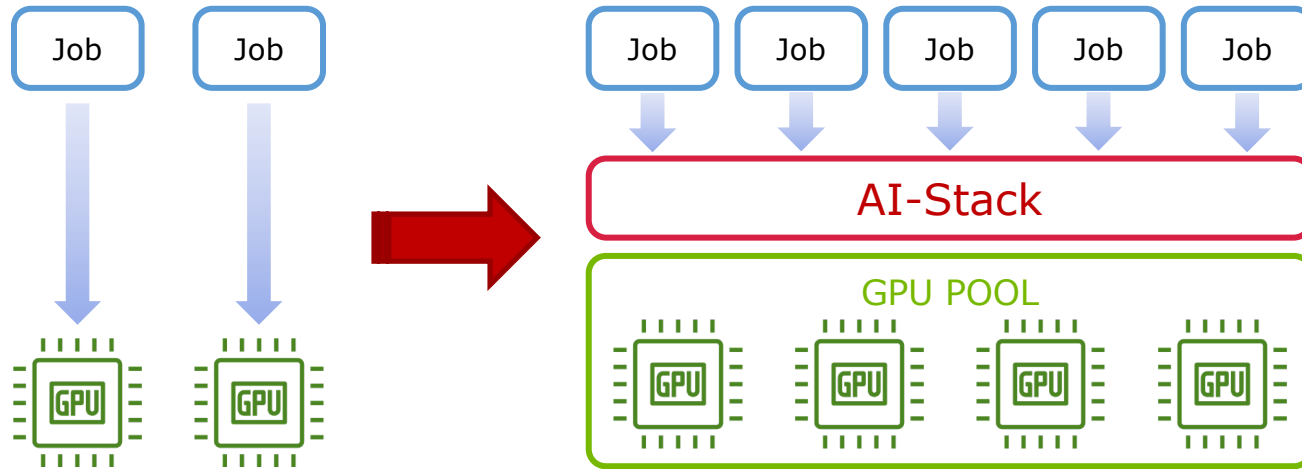

Automated execution, pre-set single or batch inference

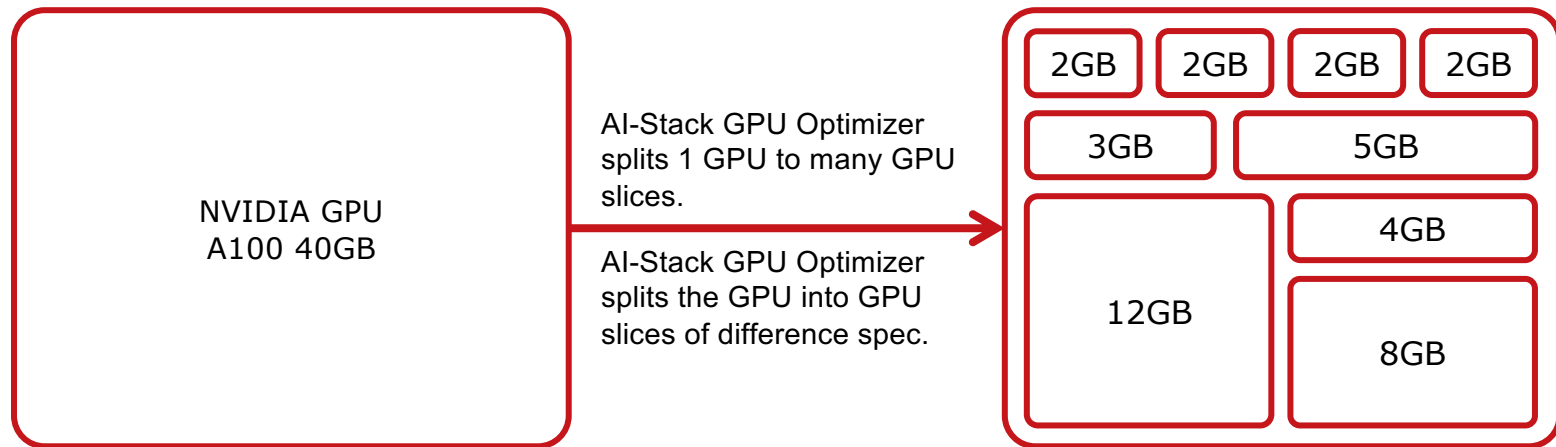

AI-Stack GPU Resource Pooling System

AI-Stack unifies the scheduling of GPU resources.

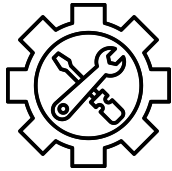

AI-Stack GPU Isolation Technology

AI-Stack isolates the GPU elasticity into many GPU slices for dividing workload requirements.

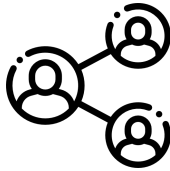

AI-Stack provides amazing benefits to customers

We are enabling organizations to orchestrate all stages of their AI work at scale, so companies can begin their AI journey and innovate faster.

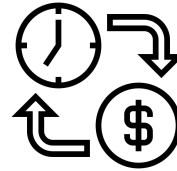

GPU utilization rate

30% → **90%**

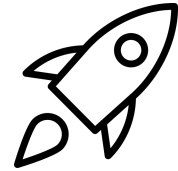

GPU usage efficiency

Up to **10⁺** people

Env. preparation time

2 weeks → **1min.**

Enlarge AI benefits

10x speed
